

## Frequently Asked Questions

### **STAIRCASE**

#### **Is the staircase a standard product “off the shelf”?**

No, every staircase is custom-made to meet the client’s specifications.

#### **Do I need to shutter the staircase?**

The staircase is a permanent precast shuttering system; although we try to minimise shuttering, additional shuttering might be required to ensure structural integrity.

#### **Is steel fixing necessary during installation?**

Yes, minimal steel fixing is required.

#### **Does the staircase need to be propped during installation?**

Yes, propping is required. Cobute gives assistance on site to set out propping specifications, as they change according to the design.

#### **What strength (Mpa) concrete is required when pouring the concrete?**

25Mpa concrete is required unless the Engineer specifies otherwise.
